

# KENNEDY SCHOOL

McMenamins

## INTRODUCTION & HISTORY

Building off the ancient tradition of the pub, bistro and coffee house, McMenamins has been introducing new gathering spots to neighborhoods of the Northwest since the early 1980s. This tradition continues with McMenamins Kennedy School, a century-old landmark standing at the center of an historic Portland neighborhood. This former grade school has been transformed into a community center and hotel, featuring 57 guestrooms and several celebration spaces. A restaurant with garden courtyard, movie theater, brewery, gymnasium, soaking pool, free WiFi, community room and several small bars complete the property.

The Kennedy School's origins date to 1913, when John Daniel Kennedy sold a four-acre parcel of his "gentleman's farm" to the Portland School District for a new elementary school. Kennedy removed his barn, hen house and orchard to make room for the small, portable school buildings initially set up on the site. Construction of the present Italian Renaissance-style building was completed in 1915.

Over the decades, the school and surrounding neighborhood developed together. Initially, the school stood just nine blocks from the city limits and was enveloped by towering Douglas firs, dairy farms and orchards. In those days, city dwellers visited the area for weekend country retreats, and teachers came to work by street car. In time, as new shops and services were established, residents found relatively few reasons to go downtown. Today, even with the advent of recent transportation and commercial developments in Portland, the community retains a close-knit feel, making a most welcoming environment for guests of McMenamins Kennedy School.

For both the business traveler and tourist,  
the rejuvenated Kennedy School is an ideal destination.
